## Why Stock Perps Matter

The Old Way:

- Building wealth through stocks meant brokerage accounts, market hours, and high barriers to entry
- Crypto traders had no easy path to stock or commodities exposure within their existing workflow
- Two worlds - crypto and traditional finance - with no bridge between them

The Stock Perps Way:

- Access global equity and commodities markets 24/7, from one platform
- Go long or short with leverage - no brokerage, no minimums, no restrictions
- Zero maker fees, ultra-low taker fees - more of your gains stay yours
- Finance and wealth creation, crypto-native style

**Bottom Line: The stock market has always been the world's greatest wealth creation engine. Stock Perps just gave crypto traders the keys.**
